PERSONAL PROJECTS

NASA Exoplanet Archive Search

Oct. 2022 – Mar. 2023

- Angular PWA that searches NASA's Exoplanet Archive and displays results in an interactive table.
 - Developed as my senior design project (jarvisar.github.io/senior-design)
- Features responsive design for mobile devices and streamlined data retrieval using caching.

Arithmetic Interpreter & x86-64 Assembly Generator

Oct. 2022 – Mar. 2023

- Developed an arithmetic interpreter and custom programming language using Python.
 - Features a lexer, parser, and semantic analyzer for AST construction and interpretation.
- Designed and implemented a code generator that translates the AST into x86-64 Assembly code.

Additional Projects Available on Personal Site
